

RIoT SOLUTIONS

Securely
Connecting
Everything™

Providing solutions for enterprise and industrial IT networks through consulting and professional services:

Technical
Architecture
& Design

Cyber Security
Services

Infrastructure
Services

Managed
Services

A truly connected world means **your networks**, must support the wave of **Digital Transformation** and the **Internet of Things** in one way or another.

No longer can we build networks and apply security later; it needs to be intrinsic to the design. Taking a logical approach to technical architecture and cyber security is the only way forward.

At RIoT Solutions, we specialise in the integration of robust and resilient ICT & IoT solutions within Australia. We help organisations capture the Digital opportunity by bringing experience in Operational Technology (OT) and Information Technology (IT) platforms, network and security, and partnering to apply this in a domain-specific context to help solve industry challenges.

With our experience of both ICT and critical network environments, we are well placed to understand the challenges and requirements of building world-class enterprise and smart & connected networks. We are the experts at Securely Connecting Everything™.

Solving IT and OT problems for these sectors:

- **Enterprise & Government**
ICT Networks *Campus, WAN, Data Centre, Software-Defined & Security*
- **Smart & Connected Networks**
for Smart Cities, Manufacturing & Biomedical
- **Industrial IT Networks**
for Mining, SCADA & Critical infrastructure Safety
- **Transport**
Roads, Light & Heavy Rail
- **Utilities**
Power, Energy, Water & Sewerage
- **Buildings**
Security for Building Management Systems (BMS)

Why RIoT Solutions?

Our people; a hand-picked assembly of experts addressing the challenges faced by your company and customers.

- ✓ Our structure and business model allow us to be agile, flexible and attentive to customers' requirements.
- ✓ Self-motivated, responsible and trustworthy staff carrying a 'can-do' attitude and a high level of emotional intelligence to complement their wealth of technical expertise.
- ✓ Partnering is at the heart of our company strategy and we pride ourselves on successful outcomes.
- ✓ Our consultants and engineers are industry certified for both network and security (CCIE, CCDA, CMNA, OSCE, OSCP, OSWP, CSSA) and have attended a diverse range of focused training courses and conferences.

It's time to be **Smart. Connected. Secure.**

We provide the 'Digital Plumbing' for enterprise and industrial IT networks through technical architecture, design, implementation, assessment, and managed services that deliver smart, connected outcomes.

Technical Architecture & Design Services

Our proven methodology allows quicker execution whilst creating a blueprint for the future. Our approach, based on industry best practice, provides both a short- and long-term strategy regarding the design of complex environments.

- Technical Assessment
- High Level Design
- Validation & Verification
- Architect-as-a-Service

Cyber Security Services

Assurance services, you can depend on with a highly pro-active approach. Our portfolio of Services and experience covers all areas of security for both enterprise-grade and critical networks supporting systems such as Real-Time SCADA and other devices.

- Risk & Threat Assessments
- Attack Simulation
- Advisory-as-a-Service
- Critical Infrastructure & Industrial Control Systems Security

Infrastructure Services

Detailed design and implementation services for Network, Security and Cloud infrastructure. With a wide range of skills, certifications and subject matter expertise, we have multi-domain capabilities across a range of vendor technologies.

- Detailed Design
- Implementation
- Configuration Reviews
- Advanced Troubleshooting

Managed Services

Next-Level support and solution to fit your IT or OT business needs. Via our Security Centre based in Brisbane we can be a point of escalation, resolution or a complete support partner. We offer a range of features including a local Service Desk, 24 x 7 on-call support and SLA's.

- Network & Security Infrastructure
- Managed SIEM and Threat Intelligence
- Insider Threat Monitoring
- Incident Response
